Response to Amendment

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office Action.
2. Claims 36, 41 and 72 have been amended. Claims 48-61, and 63-65 remain withdrawn from consideration. Claims 36-39, 41, 42, 45-47, 62, 66, 67 and 69-72 are under consideration.
3. The rejection of claims 36-39, 41, 42, 45-47, 62, 66, 67 and 69-72 under 35 U.S.C. 101 because the claimed invention is not supported by either a specific, substantial asserted utility or a well established utility are withdrawn.
4. The rejection of claims 36-39, 41, 42, 45-47, 62, 66, 67 and 69-72 under 35 U.S.C. 112, first paragraph for not being supported by either a asserted utility or a well established utility, is withdrawn.

Claim Rejections Maintained

5. The rejection of claims 36-39, 41, 42, 45-47, 62, 66, 67 and 69-72 under 35 U.S.C. 112, first paragraph, for not providing support for variants of the disclosed differentiation-inducing factor is maintained for reasons of record. Applicant argues that the specification fully enables the isolation and screening of the claimed variant fragment and points to pages 18-22 of the specification. However, on examination of those pages, it is notes that they describe only the single differentiation-inducing activity that has been disclosed. The specification provides no guidance as to where to obtain cells that would contain such variants of the differentiation-inducing activity, or if such variants exist, or must be obtained by the expression of synthetic polynucleotide sequences.

Art Unit: 1642

6. Claims 36-39, 45-46, 66 and 69-72 rejected under 35 U.S.C. 102(b) as being anticipated by Dormer et al (Experimental Hematology, 1992, Vol. 20, p. 758). Applicant argues that since Dormer et al does not disclose specific molecular weight range, mRNA expression pattern, cDNA and mRNA encoding said protein, that the reference does not anticipate the claimed product. However, a the protein disclosed by Dormer appears to be the same protein as claimed as it is obtained from the same source and exerts the same functional activity of the claimed protein. Therefore, further characteristics of the claimed protein represent inherent properties of the differentiation-inducing activity.

7. All other rejections and objections as stated in Paper No. 20 are withdrawn.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
